Cross-Border Education and Development Co-operation
with German high Education
Institution-expectation from the south
1.1. Systematic capacity building is a long time process.

- Resource personnel development: 3-5 years
- Curriculum development: 2-4 years
- Course management: 2-4 years
- Laboratory development: 2-5 years
- To be well-known and sustained course: 10 years.

• Therefore it is nearly impossible that students themselves would buy such a course.

• So far we are once requested for information from the Srilanka officials about the course fee, while there are 3 participants from Livestocks companies.
3. How to work under the cultural difference?

- We are living on much different world:
  
  - different language and different perception
  - Beer is Nahrungsmittel in Germany. It is forbidden to drink it in Thai campus.
  - QA, rule & regulation, American & European system, subject certificate, M.Sc./ MSc, budgeting system, public transport
  - There is always threat and sensitive to become failure in co-operation originating from not success in balancing the difference; much patience should also be given.

4. Continuity

- Asia is the world largest livestock producing area.
- East Asia is considered the origin of Influenza pandemic
4.2. Spiritual development is also expected from the former Thai education: how to fulfill the programme with spiritual value

- Science is a double-edged sword. We should not offer the sword to the robber.
- The current education is promoting and driving the whole world only to the materialism, like the dog without tail of Isop.
