**Abstract**

The author examined the relationship between alumni giving and membership in a dues-based alumni association. The researcher used the chi-square test of association to analyze population data derived from the database of a public doctoral-granting research university in the South. The study unveiled a relationship between membership and giving, with current alumni association members being 4.8 times more likely to be current university donors than non-members and 11.5 times more likely to be current donors with cumulative giving of at least US
